Dear Hiring Manager,

I'm reaching out to apply for a technical role at your company. I have a strong background in data analytics, machine learning, and software engineering, and I'm excited to bring my skills to a team that values data-driven solutions.

In my previous role at Harman Connected Services, I helped improve a hospital information system by streamlining workflows and making the system more efficient, which led to a 10% boost in client satisfaction. I also used machine learning models like SVM and KNN to analyse mental health data, which improved our prediction accuracy significantly. Through these experiences, I've developed hands-on expertise in Python, SQL, Tableau, and REST APIs, as well as experience with large databases like PostgreSQL and Oracle.

Currently, I'm completing a Master's in Data Analytics & Visualization at Yeshiva University, which has helped me strengthen my data science skills. I'm also certified in Advanced Machine Learning, so I stay up-to-date with the latest tools and methods.

Thank you for considering my application. I look forward to the chance to discuss how my experience and skills can contribute to your team's success.

Best,

Shashank Shekhar
